Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 11, 12, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carter (U. S. Pat. No. 1,501,746) in view of Eiermann (WO 03/055373) (description of figures taken from US Publication 2004/0261824). Re claims 1, 11 and 19, Carter discloses the a laundry washing laundry machine comprising: a steam generator (1) for generating steam; a spray nozzle for spraying steam generated from the steam generator. That differs from the claims only in the recitation of the circulation pump Eiermann discloses a dishwasher, which is a type of washing machine, including a tub (2) and drum (16) Eiermann also discloses the steam dispenser (steam generator, 18, 7), circulation pump (17), a single spray nozzle (9), and back-current preventing branch unit which is connected to the steam generator by a steam supply line, connected to the circulation pump by a circulation line (see Fig. 2) and prevents circulation water supplied to the spray nozzle from flowing back to the steam supply or steam supplied to the nozzle from flowing back to the circulation line (Fig. 5, Items 27, 26, 24', 23'). Eiermann further discloses the spray device having a main body connected to the steam supply line and circulation line and a spray unit formed at the end, steam and circulation passages and a connection unit which the steam supply and circulation supply are connected (Fig. 5). It therefore would have been obvious to one having ordinary skill in

the art to modify the arrangement of Carter to include a pump as taught by Eiermann, for the purpose of reusing the wash fluids as is common in the art.

2. Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.
